Notice of Application for Change of Market Segment to the Standard Market of the Tokyo Stock Exchange

Link-U Group Inc. (the "Company") hereby announces that it has applied to Tokyo Stock Exchange, Inc. (the "TSE") for a change of its market segment from the Prime Market to the Standard Market, as detailed below.

1. Background of the Application for Transition to the Standard Market

The Company has been promoting initiatives to increase its market capitalization of tradable shares and meet other maintenance criteria for the Prime Market. However, as the likelihood has increased that the Company will not be able to meet the relevant listing criteria within the improvement period ending July 31, 2026, the Company has applied to change its market segment from the Prime Market to the Standard Market.

2. Purpose of the Transition to the Standard Market

As a medium- to long-term growth strategy aimed at enhancing corporate value, the Company has set forth the acceleration of its global expansion. In promoting partnerships and pioneering new relationships with major overseas clients, IP holders, and business partners, our social credibility as a TSE-listed company and our financial transparency serve as an extremely crucial business foundation.

Even on the Standard Market, the Company will maintain and leverage this foundation of credibility while striving to enhance corporate value by simultaneously driving a growth strategy centered on global expansion and its capital policies as two key pillars, with the ultimate goal of re-complying with the Prime Market listing criteria in the medium to long term.

3. Outlook

Regarding the transition to the Standard Market, the Company will promptly announce any matters that require disclosure as soon as they are determined, such as approval from the TSE.
