Notice Regarding the Launch of the Corporate Power Supply Service "Battery Option"– Installation of a battery storage system serving as emergency power without initial investment–

PowerX, Inc. (the "Company") hereby announces that at the Executive Committee meeting held on March 13, 2026, it resolved to begin providing the corporate power supply service "Battery Option" as described below.

1. Purpose of the Service Launch

As a new option for its corporate electricity supply service, the Company will begin providing the "Battery Option" (the "Option"), which enables the introduction of the Company's battery storage system with effectively zero initial investment*1, starting today.

This Option is available to customers who subscribe to the Company's corporate electricity retail plans (Advance Plan, Semi-Flat Plan, Flat Plan, and Market-Linked Plan). The Company's stationary battery storage system can be introduced at facilities such as medium-to-large retail stores and factories that have high-voltage or extra-high-voltage electricity contracts.

The battery storage system installed at the customer's premises will be utilized as follows during normal times and emergencies.

Normal times: Customers can use electricity as they have done previously. The operation of the battery storage system will be fully handled by the Company, and no routine operational work is required on the customer's side.

Emergency situations: In the event of a power outage caused by natural disasters or other events, the battery storage system's islanding operation function will supply the electricity required to operate facilities such as stores and factories.

Construction, maintenance, and operation of the battery storage system will all be carried out by the Company. Customers do not require specialized knowledge or operational work, and installation is possible in a space approximately equivalent to one parking space.

*1 Installation of the battery storage system requires a lease agreement. By deducting an amount equivalent to the monthly lease fee from electricity usage charges, the structure ensures that no effective additional burden is incurred by the customer.

2. Overview of the New Service

(1) Details of the Service

About the Battery Option

- Target customers: Corporate customers with high-voltage or extra-high-voltage

electricity contracts

- Applicable plans: All electricity retail plans provided by the Company (Advance Plan, Semi-Flat Plan, Flat Plan, and Market-Linked Plan)
- Service areas: Areas where the above retail plans are provided (nine regions nationwide excluding Okinawa)
- Battery storage system: Medium-scale battery storage system “PowerX Cube 360” (Nominal capacity: 358 kWh)
- For large-scale commercial facilities and factories, installation of larger battery storage systems will be proposed.
- Installation cost: Installation of the battery storage system requires a lease agreement. By deducting an amount equivalent to the monthly lease fee from electricity usage charges, the structure ensures that no effective additional burden is incurred by the customer.

(2) Department Responsible for the Service
Electronic Power Business Department

(3) Amount and Details of Special Expenditures Required for the Start of the Service
No special expenditure is expected.

3. Schedule

(1)	Executive Committee Resolution Date	March 13, 2026
(2)	Service Start Date	March 13, 2026

4. Outlook

The impact of this service on the Company’s performance for the current fiscal year is expected to be minor; however, over the medium to long term the Company believes it will contribute to enhancing the Company’s corporate value. If material matters arise regarding progress or investment decisions, the Company will promptly disclose such information through timely disclosure and other means.
