ASKA Pharmaceutical Holdings Co., Ltd.

CDP2026: ASKA Scored B in Climate Change, B in Water Security, and C in Forests

TOKYO, November 27, 2026 – ASKA Pharmaceutical Holdings Co., Ltd. (TSE: 4886, Head Office: Minato-ku, Tokyo; President and Representative Director: Sohta Yamaguchi, hereinafter "ASKA") is pleased to announce that it scored "B" in Climate Change, "B" in Water Security, and "C" in Forests in the CDP2026. Notably, ASKA's Water Security score improved by one level from "B-" in the previous year to "B" this year.

CDP is a non-profit organization that operates the world's only independent environmental information disclosure system, and many companies, financial institutions, and local governments use CDP's system to manage their environmental impact. CDP evaluates the data reported by the organizations that disclose information using its own methods and scores it on an eight-point scale (A, A-, B, B-, C, C-, D, D-).

Reference: In CDP2025, more than 22,100 companies around the world responded, and more than 2,100 Japanese companies, including more than 70% of companies listed on the TSE Prime Market, are said to have disclosed information.

The "B" scores received this year indicate the "Management" level, meaning that the company understands its environmental risks and impacts and is taking action to address them, while the "C" score indicates the "Awareness" level, meaning that the company recognizes the relevance of environmental issues to its business.

Under the Medium-Term Management Plan 2028, ASKA aims to "Deepen Our Core Strengths and Build the Business Foundation to Support Global Expansion for Sustainable Growth." On the environmental front, ASKA recognizes climate change and other environmental issues as management issues that will impact its business and is actively working to address them.

ASKA views these results as recognition of the ASKA Group's efforts to address environmental issues. Going forward, the Group will continue to promote decarbonization, conserve water resources, and address other environmental issues, thereby contributing to the realization of a sustainable society.
