Notice Regarding Change in Reportable Segments

At the Board of Directors meeting held on November 12, 2026, the Company resolved to change its reportable segments, effective from the first quarter of the fiscal year ending September 30, 2027, as described below.

(Detail)

1. Reason for the Change in Reportable Segments

The Group leverages its strengths in cloud integration and services centered on Microsoft Cloud to provide customers with end-to-end support - from the implementation and utilization of cloud services to operations and security - while positioning AI, business IT, and global business as growth areas, and working to expand its business domains.

Against this backdrop, in light of the Group's integrated business operations which provide an integrated offering for customers' cloud and AI utilization, ranging from planning, platform design and construction to operations, monitoring, and enhancement, the Group has reviewed the units used for allocating management resources and evaluating performance, and has decided to combine the Cloud Integration Business and the Cloud Service Business into the Engineering Services Business.

Accordingly, the Company will change its reportable segments based on the management approach.

2. Details of the Change in Reportable Segments

After the change, there will be the following two reportable segments: the Engineering Services Business and the License & Products Business.

Before the change	→	After the change
Cloud Integration Business		Engineering Services Business
Cloud Service Business		(Integrated into the above)
License & Products Business		License & Products Business (unchanged)

(Reference) Description of Each Segment After the Change

Segment name	Description
Engineering Services Business	Supports customers' digital transformation (DX) and ongoing and effective use of IT through the end-to-end provision of services, starting with consulting and spanning the development of business applications compatible with multi-cloud environments, cloud integration, the construction and implementation of IT infrastructure and security, as well as operations, maintenance, and managed services.
License & Products Business	Primarily provides licenses for cloud products such as Azure, M365, and D365 and sells IT-related equipment, while also supporting customers' ongoing use of these products through license management and optimization.
