note Launches "note API" for Corporate Users

Enabling Article Creation and Management from External Services

note has launched the "note API," which allows users to create and manage note articles from external services. This feature is available for companies using "note pro," a premium plan for corporate users. As the first step, note has integrated with "StoryHub Studio," an all-in-one AI editing assistant provided by StoryHub Inc. Starting today, articles created on this service can be saved as drafts on note. We plan to gradually expand the number of compatible services.

What You Can Do with the note API

The note API is a system that allows users to create and manage note articles from external services.

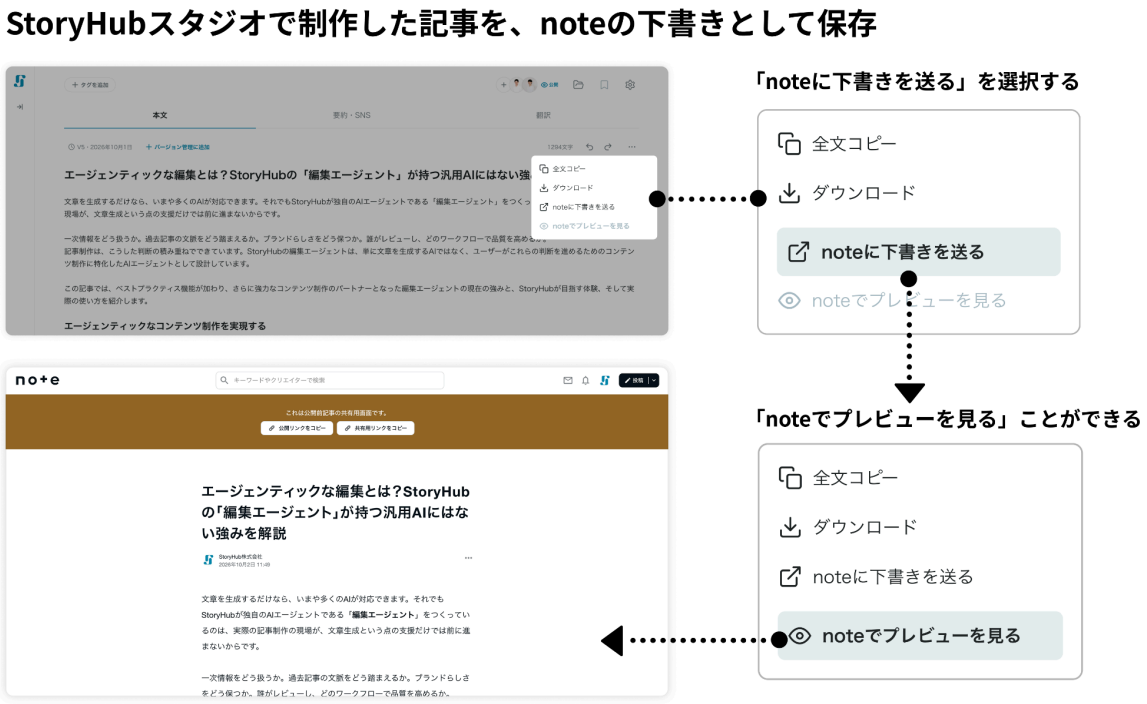

It supports creating, publishing, and updating articles, as well as adding them to magazines and retrieving data such as page views. It also supports header images, in-text images, bulleted lists, and embedded X and YouTube posts. This saves users the effort of copying and pasting articles created on external services back into note.

※Available features vary depending on the connected service.

The First Compatible Service: "StoryHub Studio"

The first compatible service is "StoryHub Studio." For example, when creating an interview article, users can use StoryHub Studio for everything from transcription to editing, and then save the finished draft directly to note.

This reduces the effort previously required to paste text and adjust formatting in note, allowing for a smooth workflow from article creation to saving on note. Users will continue to publish articles from the note platform as usual.

※"StoryHub Studio" does not support some features, such as setting header images, setting up paid articles, and embedding X and YouTube posts.

How to Use the note API

- Companies subscribed to "note pro" can use this feature by linking their note accounts with compatible services like StoryHub Studio.
- No separate application to note is required. The connection method and available features depend on the service. There are no additional fees for using the note API, but standard subscription fees for both note pro and the connected services apply.

Implementing the note API in Your Services

Currently, the note API is provided to companies contracted as "Solution Partners," a category of "note pro Sales Partners."

For more details on "Solution Partners," please visit the page below:
https://biz.note.com/n/nab192eacf379

A note representative will individually answer questions and provide consultations regarding API specifications and operations.
※The development time required for implementation varies by service.

About the All-in-One AI Editing Assistant "StoryHub Studio"

"StoryHub Studio" is an all-in-one AI editing assistant that supports the entire article creation process. It is provided by StoryHub Inc. (Headquarters: Minato-ku, Tokyo; Representative Director and CEO: Shota Tajima). In July 2025, our company invested in StoryHub Inc.

note

note is a media platform where creators post text, images, audio, and videos, and users can enjoy and support that content. We value a safe atmosphere and diversity so that everyone can enjoy and continue creating. Individuals and corporations mingle, expanding opportunities to find things they like and meet interesting people. The service launched in April 2014, and approximately 89.93 million works have been created. The number of members has reached 13.13 million (as of August 2026).
