Notice of Capacity Increase Planning at Existing Controlled landfill site (TAIHEI KOSAN Co., Ltd.)

TAIHEI KOSAN Co., Ltd., a consolidated subsidiary of our company, has decided to adjust its existing Controlled landfill site (Otsukayama Clean Center) in order to increase its landfill capacity. The following is the announcement.

1.Summary

Our group is working to further strengthen the final treatment business, as part of effort, the increase in landfill capacity has been completed and operations have commenced at two existing landfill sites (Enshu Clean Center and Hamanako Clean Center) held by MIDAC Co., Ltd., our consolidated subsidiary.

Additionally, at TAIHEI KOSAN Co., Ltd., which became a subsidiary in April 2025 as part of a support-type M&A, restrictions on waste intake had been continued due to construction work on the third landfill site's 7h dam section since the company became a subsidiary, but intake was able to resume from November 2025.

As a result, the expansion of business areas in the Kanto region, as set forth in the MIDAC Group's 10-year vision "Challenge 80th," has been realized.

In order to respond to landfill demand in the Kanto area, where waste generation is high, we have decided to make specific adjustments toward the establishment of a 4th landfill site at TAIHEI KOSAN Co., Ltd. (Otsukayama Clean Center), utilizing the experience and track record our company has cultivated thus far. Although this project is a medium-to long-term installation plan, the planned increase in landfill capacity is approximately1,300,000 ㎥, and the permitted capacity after the increase is expected to be approximately 4,330,000 ㎥. This is expected to be a facility with a larger permitted capacity than MIDAC Co., Ltd.'s existing Controlled landfill site "Okuyama-No-Mori Clean Center (Permitted Capacity: Approx. 3,190,000 ㎥)."

Our group is steadily expanding the capacity of landfill sites entrusted ,and by executing our plan to increase the capacity of TAIHEI KOSAN Co., Ltd., a key base in the Kanto region, we will respond to the strong demand for landfill from the Kanto region, which we expect to see in the future, and further strengthen the competitiveness of this business and our medium-to long-term earnings base.

TAIHEI KOSAN Co., Ltd. is planning to increase the capacity of its landfill sites, which will be introduced in a video format on IR newsletter (https://www.midac.jp/ir/news.html) of our website.

2. Overview of Increase

Business Office	landfill capacity		
	Before change	After change	Increased capacity
TAIHEI KOSAN Co., Ltd. Otsukayama Clean Center （Controlled landfill site）	3,030,191 ㎥	Approx. 4,330,000 ㎥	Approx.1,300,000 ㎥

※The capacity after the increase may fluctuate due to the revision of the plan, etc.

3.Impact on results for the fiscal year under review

This is a medium-to long-term installation plan and has no impact on consolidated results for the fiscal year under review.
