# Announcement Regarding CDP 2025 Climate Change Questionnaire Scores: "B" in Climate Change and "A-" in Water Security

EXEDY Corporation (Head Office: Neyagawa City, Osaka; Representative Director and President: Tetsuya Yoshinaga) is pleased to announce that it has received a "B" score in the "Climate Change" category and an "A-" score in the "Water Security" category in the corporate survey conducted by CDP, an international environmental disclosure system. Details are as follows.

CDP is a non-profit organization that operates the world's only independent environmental disclosure system, utilized by numerous companies, financial institutions, and cities to manage their environmental impacts. CDP independently evaluates data reported by disclosing organizations using its proprietary methodology, assigning scores across eight levels (A, A-, B, B-, C, C-, D, D-). The "B" score achieved by our company in the "Climate Change" category is positioned at the "Management Level" according to CDP's evaluation criteria. This score recognizes that our company not only acknowledges and understands the results of actions and processes for managing environmental issues but also actively implements them. Furthermore, in the "Water Security" category, our score improved by one rank from the previous year, achieving an "A-" rating, which signifies the "Leadership Level".

Our company is committed to minimizing environmental impact by thoroughly implementing efficient electricity utilization in our manufacturing processes. Even with limited resources, we promote the effective use of resources and energy conservation, thereby contributing to the realization of a sustainable society. With a long-term vision of " Contributing to the minimization of the environmental impact including the creation of a decarbonized society", we will continue our efforts toward global environmental preservation and the creation of economic value.
