Announcement of Commencement of Commercial Production at the Malaysia Plant

Menicon Co., Ltd. (hereinafter, "the Company") is pleased to announce that its new manufacturing facility in Kedah, Malaysia, has commenced commercial production.

The Malaysia Plant is a dedicated manufacturing site for daily disposable contact lens (1-DAY lens), representing the Company's largest site, and plays a key role in meeting the rapidly growing global demand for 1-DAY lens. Construction of phase 1 is currently underway and will provide capacity for up to 500 million lenses per year. The construction plan is strategically formulated to extend through phase 4, allowing for further expansion in line with future market demand. With the continued installation of additional production lines, the Company envisions a system capable of producing up to 2 billion lenses annually in the future.

Beginning with the commencement of commercial production at the Malaysia Plant, the Company will further strengthen its ability to deliver products stably to customers across Europe, North America, other global markets, and Japan.

As the global market for 1-DAY lens continues to grow, Menicon aims to further enhance its presence and continue creating long-term value for society by providing better vision to people around the world.
