Notice Concerning the Establishment of a Local Subsidiary in India by Our Subsidiary

We hereby announce that at the meeting of the Board of Directors held today, it was resolved that our subsidiary, ETO Co., Ltd. (Yokohama, Kanagawa, Japan), will establish a local subsidiary in the Republic of India, as detailed below.

1. Reason for Establishment

In its medium-term management plan, "KBK Plus One 2025," our group has set a key strategy for the machinery parts division to comprehensively support the overseas expansion of our customers, contribute to the creation of business opportunities, and strengthen our global supplier and supply networks, as well as our quality control systems in the vehicle, housing equipment, device, and electronics sectors.

India, which continues to experience remarkable economic growth, is said to be in a demographic bonus period until around 2050 and is expected to become the world's third-largest economic power in terms of GDP in the future. While sustained market expansion is expected to continue, supported by the development of the manufacturing industry and strong domestic demand, the business environment is changing significantly, with stricter import regulations, such as the BIS regulations (the Indian version of JIS), and the successive entry of competitors into the Indian market.

With the establishment of this local subsidiary, we will strive to improve services to existing customers and promote the development of local suppliers within India. Through this, we will establish a system to expand sales of Indian products to customers both in Japan and overseas, and by expanding ETO's overseas network, we will build a support system to respond quickly and accurately to the diverse needs of our customers.

Our group will continue to promote global business development with the aim of further improving customer satisfaction.
