(3) Reason for the changes

For the second quarter (cumulative) of the fiscal year ending March 2027, we have revised our earnings forecast upward. This revision reflects the fact that net interest income is expected to exceed our initial projections, driven by our ability to effectively capture rising market interest rates amid policy rate hikes and other factors, as well as the steady progress of our group-wide "Marugoto Support" initiatives, which provide comprehensive support to all customers in our region.

Regarding our full-year earnings forecast, we are currently reviewing our securities portfolio in a flexible manner in response to changes in domestic and overseas economic conditions and financial markets. As it is difficult to reasonably estimate the impact of such changes on our earnings at this time, we have decided to leave our full-year earnings forecast unchanged. Should a revision become necessary in light of future business performance and other developments, we will announce such changes promptly.

The financial results forecast contained in this document has been prepared based on information available as of the date of announcement. Actual results may differ materially from the forecast due to various factors in the future.
